At PRAXIS Technology Escrow, we're raising the bar on software and SaaS protection with our **Infinite Retention** policy—ensuring every version of your source code and critical IP is securely stored for the life of the agreement.

No other escrow provider in the industry offers Infinite Retention. With most providers, each new escrow deposit replaces the previous one, and only the most recent version is retained—leaving you without backups. This approach lacks an audit trail and leaves no room for error, exposing you to unnecessary risks.

Why Does Infinite Retention Matter?

At PRAXIS, our innovative Infinite Retention policy maintains all customer escrow deposits for the life of the contract. Deposits are never lost or deleted. Here's why this is important:

- **Accidental deletions** – If you ever accidentally lose or delete code, we've got you covered. You can always go back to the previous version.
- **Business continuity** – You can recover any version, anytime, to keep operations running smoothly, even if an error or loss occurs in current repositories.
- **Compliance and trust** – You'll be able to meet regulatory and contractual requirements with detailed records, giving stakeholders confidence.
- **Dispute resolution** – Full-version histories clarify ownership and milestones when disputes arise. A complete IP audit trail is available whenever you need it.

Read this Case Study to learn how PRAXIS' Infinite Retention Policy helped safeguard business continuity for a financial services giant.

“

“PRAXIS had all the things I was looking for, seamless integration to my development environment, streamlined onboarding processing for new clients, straight forward pricing model, and a responsive customer support mechanism.”

– Hans Otharsson, OpenLegacy

How Does It Work?

PRAXIS' Infinite Retention policy works hand-in-hand with our Automated Escrow solution and is underpinned by our robust security protocols. With Automated Escrow, we seamlessly connect to platforms like GitHub or Bitbucket, cloning repositories weekly and retaining every version. Coupled with our SOC2-compliant security and retention policy, you can trust that your IP is protected, intact, and accessible when you need it, for as long as the escrow agreement is in place.

Unless the agreement is terminated by mutual consent or the software user (beneficiary) provides written instructions, we'll retain your materials until the escrow account is closed. While this policy protects long-term access, it's important to note that PRAXIS cannot guarantee the materials will remain usable or compatible with future technologies.

Case In Point

PRAXIS' Infinite Retention policy ensured critical business continuity for a client who requested an escrow release after their software provider could no longer support its application. When the client tried to rebuild the application using the source code in escrow, they discovered the build instructions were missing. With other escrow providers, this might have been a dead end. However, because PRAXIS retains all previous deposits, including source code and supporting materials, the client was able to retrieve the necessary instructions and successfully rebuild their business-critical application, avoiding operational disruption and preserving continuity.

With Infinite Retention, every version of your source code and other critical IP is preserved indefinitely, providing unparalleled protection and peace of mind.

About PRAXIS

At PRAXIS Technology Escrow, we combine innovation with security to protect your most critical software and technology assets. As innovators in the field since 2016, PRAXIS offers the most advanced solutions in the industry, ensuring your deposits are always up to date and never lost, thanks to our Infinite Retention Policy™. Providing services worldwide from our U.S. headquarters, we pride ourselves on delivering flexible, tailored escrow agreements that meet each client's unique needs, backed by PRAXIS' unmatched personal service. Our team of experts provides trustworthy and responsive support, ensuring your business continuity is always protected.
